

Origo A100

A new single burner alcohol stove with electric ignition.

Features

- **Built-in 12 volt lighter** - eliminates matches or lighter
- **33% smaller than current model** - more counter space
- **New styling** - simple and easy to use
- **Non-pressurized alcohol** - safest way to cook afloat
- **Easy installation**

- The easiest and safest way to cook afloat. This compact, stainless steel stove burns pressure-free alcohol for maximum safety.

Denatured alcohol is absorbed and bound in a nonflammable wool material. The natural capillary action draws the alcohol from storage to surface, so there's no dangerous pressure involved. 2000 Watt per burner. The stove can be supplied with a hinged tempered glass lid option.

Origo A200

A new double burner alcohol stove with electric ignition.

Features

- **Built-in 12 volt lighter** - eliminates matches or lighter
- **22% smaller than current model** - more counter space
- **New styling** - simple and easy to use
- **Non-pressurized alcohol** - safest way to cook afloat
