

Product Engineer

Dometic Corporation is a world leader, innovator and ISO 9001 certified manufacturer of air conditioning and refrigeration. Our products are sold into the marine, coach and truck markets. We provide associates complete on the job training along with the necessary tools to ensure success and career development. Dometic offers a competitive compensation package and comprehensive benefits, which include, health, dental, life, matching 401k contributions and much more.

Currently we have an opportunity for hands-on, experienced Product and Systems Engineers in our Pompano Beach, Florida and Richmond, Virginia locations.

Requirements of Position:

Responsible for new product/process design and changes to existing products/processes. Will be directly involved with new products from conception to prototype, assist in fabrication of production test devices and stations, conduct tests, collect data and all aspects of new product development. Must be capable of leading process improvement projects, generate cost estimates for custom products, perform engineering design calculations, generating design documentation, as well as evaluate alternate parts offered by purchasing and outside vendors. Individual will participate in team decision-making and problem solving with employees throughout the organization. Experience with chiller production and semi-hermetic compressors and tube in shell heat exchangers or experience with product design of air conditioning equipment highly desired.

The successful candidate will have:

- Solid product design and technical experience.
- Solid modeling CAD experience desired.
- Design or application experience with HVAC products, thermodynamics, and heat transfer or compressor technology is a plus.
- EPA Type I and II Certification required for mechanical position.
- BSME and/or equivalent experience, and a solid working knowledge of computers and software typically used in the engineering field.

Note:

Dometic reserves the right to revise or change job duties or responsibilities as the need arises with the cooperation and agreement of current position holder. This job description does not constitute a written or implied contract of employment.
